

BLOODLINK

BLOOD

DONATION DAPP

TRANSPARENT GIVING FOR A
HEALTHIER TOMORROW

TEAM: WEB BREACH

Mission & Vission

- **Mission:** To revolutionize blood donation by leveraging blockchain technology, ensuring transparency, security, and accessibility, while fostering a community of proactive donors and recipients.
- **Vision:** To create a decentralized, efficient, and trustworthy global ecosystem for human and animal blood donation, reducing wastage, saving lives, and promoting health equity.

Problem Statement

- The current blood donation and distribution systems face significant challenges, including lack of transparency, inefficient tracking, and high rates of blood wastage.
- Donor and recipient compatibility issues, limited donor engagement, and insufficient incentives further exacerbate the problem.
- Additionally, animal blood donation systems are underdeveloped, with no standardized or decentralized framework to address urgent needs.

Impact

In January 2024, the American Red Cross declared a national emergency due to the shortage of blood. They're seeing the lowest number of people giving blood in the last 20 years. There's been a 40% decrease in the number of people donating.

What are we Solving?

- 1. Transparency in Blood Donation**
- 2. Minimizing Blood Wastage**
- 3. Efficient Donor-Recipient Matching**
- 4. User Registration and Authentication**
- 5. Lack of Donor Engagement and Motivation**

Solution

- Introduce **Blood Donor Coins (BDC)** as rewards for every accepted donation.
- Reward donors with **NFT Donation Certificates** for every contribution, creating a sense of pride and accomplishment.
- Expand the utility of **BDC tokens** for use in hospitals, gyms, and medical stores, motivating long-term engagement.
- Integrate a **geo-based matching** system that connects nearby donors and recipients.

Cost structure

- **Development Costs (30%):** Smart contracts, platform UI/UX, and Aptos chain integration.
- **Marketing & Outreach (25%):** Awareness campaigns for social causes and businesses
- **Operational Expenses (30%):** Hosting, customer support, and legal compliance.
- **Security (15%):** Regular audits to ensure platform integrity.

Key Features

- **Donor Registration:**
 - Collects donor details (Name, Age, Location, Blood Group, etc.).
 - setDonor() function stores data on the blockchain.
- **Requesting Blood:**
 - Hospitals request blood by Blood Group and Location.
 - setReq() function maps requests to the requestor's address.
- **Accepting Requests:**
 - Donors confirm requests via requestAccpt() function.
- **Blood Donor Coins (BDC):**
 - Rewards for accepted donations using the transfer() function.

Additional Features

- **Medical Documentation:** Maintain donor and recipient health records.
- **Blood Test Reports:** Ensure blood quality and compatibility.
- **BMI Monitoring:** Track donor health over time.
- **Medical Alerts:** Notify donors of health restrictions based on history.
- **BDC Token Utility Expansion:** Usable in hospitals, gyms, and medical stores.

Benefits of Dogin

- Ensures timely availability of animal blood for emergencies.
- Promotes community-driven animal health support.
- Encourages pet owners to participate in donation programs.
- Strengthens animal welfare through decentralized systems.

THANK YOU
